Ordinance number: _____ Date of ordinance: _____

Is the reconstruction or renovation complete replacement or refitting of an existing building?

Yes

No

An application for the value added exemption must be filed by February 1 of each assessment year in which value added is first assessed for taxation. If prior approval has been granted the application for exemption must be filed by February 1 in the assessment year following the year in which the new construction is completed.

The reconstruction or renovation of an existing building qualifies as new construction if it constitutes complete replacement of an existing building or refitting of an existing building if the reconstruction or renovation is (1) required due to economic obsolescence, (2) is required to implement recognized industry standards to competitively manufacture or process products, or (3) is required to market a building as a speculative shell building. Prior approval must be received from the city council or county board of supervisors for this exemption to be allowed.

An application for the reconstruction and renovation exemption (not value added) must be filed by February 1 of the assessment year the project commences. The reconstruction or renovation exemption (not value added) that constitutes complete replacement or refitting of an existing building does not have to meet the criteria enumerated above for new construction (value added exemption).

I, the undersigned, declare under penalties of perjury or false certificate, that I have examined this application, and, to the best of my knowledge and belief, it is true, correct, and complete.
