

## REVENUEE

## Fuel Tax Monthly Report for July 2014

The lowa Fuel Tax Monthly Report presents the gross gallons of fuel delivered by lowa licensed Suppliers, Blenders, Importers, Restrictive Suppliers, and Liquefied Petroleum Gas/Compressed Natural Gas Dealers and Users. The report captures information on a monthly basis and is made available on the Motor Fuel page of the lowa Department of Revenue website. The report is available no later than the last working day of the month following the tax period covered by the report. For example, the report containing information for the July 1 to July 31 tax period will be available by August 31.

The first page of the report shows monthly collections for nine fuel types as well as collections from prior tax periods reported as accounts receivable. Fiscal Year-To-Date and Prior Fiscal Year-To-Date collections, refunds and credits, and collections less refunds and credits are also provided, along with the percent change between the two years. Refund claims can be filed throughout the year, while credits are claimed only once a year on annual income tax returns.
Figure 1 compares monthly numbers across the last 24 months. Net collections in July 2014 were slightly higher than in July 2013, a result of year-over-year increases in both gasohol and diesel taxable gallons. Taxable gallons of gasoline decreased during this same period. Monthly collections were higher than prior year numbers in ten of the last twelve months.

Figure 1. Iowa Monthly Fuel Tax Collections Less Refunds and Credits: Most Recent 12 Months Compared to Prior 12 Months for July 2014

The second page of the report displays gross gallons and taxable gallons by fuel type for Motor Fuel, Special Fuel, and Liquefied Petroleum Gas \& Compressed Natural Gas. (This is the final month CNG is reported in the taxable units of 100 cubic feet instead of gallons. To convert to gallons, multiply by 1.2667.) The main factor in the difference between gross and taxable amounts is exported gallons, where lowa exports well over half of the gasohol (ethanol-blended fuel) produced in the state.
The gallon amounts contained in this report are from the Supplier/Terminal or "Rack" level. Further blending of the products may occur throughout the different levels of the fuel distribution chain. This is the case for most E85 gallons, which is why the gallons reported do not reflect actual retail gallons sold in lowa.

In 2000, taxable sales of gasohol and gasoline were roughly equal. Figure 2 shows that over the next six years, demand shifted toward gasohol sales which rose to over two-thirds of gallons sold, except for August 2006 when a temporary price shift drove a brief change in demand. Since 2007, gasohol has accounted for a monthly average of 73 percent of taxable gallons of motor fuel. In July 2014, gasohol accounted for 76 percent of taxable gallons of motor fuel sold. Annual total taxable gallons of gasohol increased 17 percent between 2004 and 2014, taxable diesel gallons increased 20 percent, while taxable gallons of gasoline decreased 25 percent.

Source: lowa Department of Revenue

The report also shows a breakdown of the refund dollar amounts by claim type for the month. Refunds are claimed against taxes paid on fuel that is used for non-taxable purposes, such as agricultural or commercial non-highway uses. Refunds are also claimed for Excess Tax on Gasohol and Denaturing Alcohol. The excess tax on gasohol refund results when a blender purchases gasoline taxed at 21 cents per gallon and collects tax on the resulting gasohol at 19 cents per gallon; therefore, the additional 2 cents paid on the gasoline is eligible for refund. The denaturing alcohol refund applies when the denaturant (gasoline) taxed at 21 cents per gallon is blended with food grade alcohol to produce ethanol. When a refund of lowa fuel tax is granted, those gallons become subject to lowa sales tax, unless a sales tax exemption applies. Sales tax collected on those gallons is included at the bottom of the second page.
