

## Retail Sales and Use Tax Quarterly Report

## December 2014

This report covers retail sales and use tax data for taxable sales based on tax returns filed with the Department for the quarter ending December 31, 2014 which is the second quarter in fiscal year 2015. The report includes four tables covering retail sales tax collections by business group compared to the prior year, use tax collections by business group and comparisons to the prior year, retail sales and tax collections by county and business group, and retail sales and tax collections by county and city.

Effective beginning with the fiscal year 2014 quarterly and annual reports, the Department reassigned approximately 12 percent of retailers after a review of the business class codes assigned to retailers in the sales and use tax database. In addition, the Convenience Stores and Gas Stations business class was moved from the Motor Vehicle group to the Food Dealers group.

The business class code changes and the change to convenience stores and gas stations business class were not implemented for reports prior to fiscal year 2014. Therefore care should be taken when comparing business group data for fiscal years 2014 and later with fiscal years prior to fiscal year 2014.

**Business Class Definition:** The business classification for retail sales activity used by the Department is based on the 2007 North American Industry Code Classification System (NAICS). The Department attempted to match as closely as possible its four digit business class codes to the NAICS when the system was introduced in 1997. The two digit NAICS and the first two digits of the Department's business class codes represent the same 20 general categories of economic activity. However not all business class codes were changed to match NAICS at the four digit level.

Year over Year Retail Sales Tax Statistics: Table 1 compares return counts and retail sales taxes reported by the 12 business groups for the December 2014 quarter compared to the December 2013 quarter.

**Use Tax Statistics:** Table 2 includes sales and tax data for three types of use taxes: retailer's use tax, motor vehicle use fee, and consumer's use tax. retailer's use taxable sales and computed tax data are presented by business group. The data are based on taxable sales reported by registered taxpayers with use tax permits. Aggregate retailer's use tax, motor vehicle use fee, and consumer's use tax collections for the December 2014 quarter are compared to the December 2013 quarter.

**Retail Sales Tax Statistics**: Table 3 provides data for all cities in Iowa where at least 10 returns were filed during the quarter. The "Other" category provides data for all cities in each county not satisfying the minimum requirements. Table 4 provides data by 12 business groups for each county. Breakouts are provided for each business group within a county where at least 5 or more returns were filed in a fiscal year. An "S", representing "Suppressed", is used for any business group that does not have at least 5 returns filed within the county.

## Table 1. Iowa Retail Sales Tax by Business Group Quarter Ending December 31, 2014

Computed tax equals taxable goods and services subject to the 6% State sales tax multiplied by that rate plus hotel/motel room rentals and qualified construction equipment purchases subject to the 5% State excise tax multiplied by that rate.

Taxable sales include the value of taxable goods and services that are subject to the 6% State sales tax rate and the value of hotel/motel room rentals and qualified construction equipment purchases subject to the 5% State excise tax rate. Computed tax equals the taxable sales subject to the 6% State sales tax multiplied by that rate plus taxable sales subject to the 5% State excise tax multiplied by that rate.

There must be a minimum of five returns filed in a business group for the transaction data to be shown. To protect the confidentiality of the businesses, if there are less than five returns filed an S (S=Suppressed) is displayed If a county has only one business group suppressed than the next lowest return count is also suppressed.

Percentages may not sum to totals due to rounding
