## Fuel Tax Monthly Report for February 2016

The Iowa Fuel Tax Monthly Report presents the gross gallons of fuel delivered by Iowa licensed Suppliers, Blenders, Importers, Restrictive Suppliers, and Liquefied Petroleum Gas/Compressed Natural Gas Dealers and Users. The report is published on the Motor Fuel monthly reports page of the [Iowa Department of Revenue website](#). Each month's report is available no later than the last working day of the month following the tax reporting period it covers. For example, information for the tax period June 1 through June 30, which is reported to the Department of Revenue during the reporting period July 1 to July 31, is contained in the July Monthly Report.

Page 3 of the report shows monthly collections for ten fuel types as well as collections from prior tax periods reported as accounts receivable. Fiscal Year-To-Date and Prior Fiscal Year-To-Date collections, refunds and credits, and collections less refunds and credits are also provided. While refund claims can be filed throughout the year, credits are claimed once annually on income tax returns.

Figure 1 compares monthly net collections across the last 24 months. Net collections were \$52.1 million in February 2016, 56 percent higher than in February 2015. February revenues dipped from the previous month because there was a jump in refunds for blending fuel and January had included an early payment for gallons reported in February. Year-over-year growth in net collections reflects tax rate increases that became effective in March 2015. With a reported 197.0 million taxable gallons of various fuel types subject to the higher tax rates for the month, the estimated increase in collections as a result of the rate increases is \$19.7 million.

Page 4 of the report shows gross gallons and taxable gallons by fuel type. Exported gallons account for most of the difference between gross and taxable amounts since Iowa exports well over half of the ethanol blended gasoline produced in the state. Though infrequent, the number of taxable gallons may be reported in a month other than that for which taxes are remitted.

Collections and gallon amounts contained in this report are from the Supplier/Terminal or “Rack” level, not the retail level. Further blending of products may occur throughout the fuel distribution chain. This is the case for most E85 (gasoline blended with 70 to 85 percent ethanol) gallons, so the gallons reported for this fuel type are far below the number of retail gallons sold in Iowa.

In 2000, taxable sales of ethanol blended gasoline and gasoline were roughly equal. As Figure 2 shows, demand shifted over the next six years to ethanol blended gasoline, except for August 2006 when a temporary price change drove a brief reversal in demand. Over the last eight years, ethanol blended gasoline has accounted for a monthly average of 73 percent of taxable gallons of motor fuel. Since June 2015, the average percentage of taxable gallons reported as ethanol blended gasoline has fallen to 63 percent, reflecting a change in the manner in which the types of taxable gallons are reported by suppliers. Year-to-year comparisons of ethanol blended gasoline’s share of total taxable gallons should be made with attention to this limitation.

The report also shows a breakdown of the refund dollar amounts by claim type for the month. Refunds are claimed against taxes paid on fuel that is used for non-taxable purposes, such as agricultural or commercial non-highway uses. Refunds are also claimed for excess tax on blended fuel and denaturing alcohol. The excess tax on blended fuel refund results when a blender purchases gasoline taxed at 30.8 cents per gallon and collects tax on the resulting ethanol blended gasoline at 29.3 cents per gallon. Therefore, the additional 1.5 cents paid on the gasoline is eligible for refund; similarly for the 3 cent gap between taxes on diesel and B11 or higher blends. The denaturing alcohol refund applies when the denaturant (gasoline) taxed at 30.8 cents per gallon is blended with food grade alcohol to produce ethanol. When a refund of Iowa fuel tax is granted for non-taxable usage, those gallons become subject to Iowa sales tax, unless a sales tax exemption applies. Sales tax collected on those gallons is included at the bottom of the final page of the monthly report.
