

Iowa Department of **REVENUE**

Retail Sales and Use Tax Quarterly Report March 2014

This report covers retail sales and use tax data for taxable sales based on tax returns filed with the Department for the quarter ending March 31 which is the third quarter in fiscal year 2014. The report includes four tables covering retail sales tax collections by business group compared to the prior year, use tax collections by business group and comparisons to the prior year, retail sales and tax collections by county and business group, and retail sales and tax collections by county and city.

These tables match presentations of sales and use tax data in prior quarterly reports. However, between the fourth quarter of fiscal year 2013 and the first quarter in fiscal year 2014 the Department reviewed the business class codes assigned to retailers in the sales and use tax database. In that review, approximately 12 percent of retailers were reassigned to a different business class code to more accurately reflect the type of business in which the business is engaged. These business classes comprise the business groups presented in several tables, thus these reassigned classes impact tables where data are presented by business group.

A change was also made in one of the business groups. The Convenience Stores and Gas Stations business class was moved from the Motor Vehicle group to the Food Dealers group. Taxable sales in the Convenience Stores and Gas Stations business class are primarily from the sales of food items and are more appropriately assigned to the Food Dealers Group.

To provide meaningful historical comparisons, the quarter over quarter comparison by business group in Table 1 reflect the new business class assignments for both the current and prior fiscal year. Therefore, fiscal year 2013 data by business group presented here will not match the data presented in the fiscal year 2013 quarterly reports.

Business Class Definition: The business classification for retail sales activity used by the Department is based on the 2007 North American Industry Code Classification System (NAICS). The Department attempted to match as closely as possible its four digit business class codes to the NAICS when the system was introduced in 1997 the two digit NAICS and the first two digits of the Department's business class codes represent the same 20 general categories of economic activity. However not all business class codes were changed to match NAICS at the four digit level.

Year over Year Retail Sales Tax Statistics: Table 1 compares return counts and taxes reported by the 12 business groups for the March 2014 quarter compared to the March 2013 quarter.

Use Tax Statistics: Table 2 includes sales and tax data for the three types of use taxes: Retailer's Use Tax, Motor Vehicle Use Fee, and Consumer's Use Tax. Retailer's Use Sales and Tax data are presented by business group. The data are based on sales and taxes reported by registered taxpayers with use tax permits. Aggregate Retailer's Use Tax, Motor Vehicle Use Fee, and Consumer's Use Tax collections for the March 2014 quarter are compared to the March 2013 quarter.

Retail Sales Tax Statistics: Table 3 provides data for all cities in Iowa where at least 10 returns were filed during the quarter. The "Other" category provides data for all cities in each county not satisfying the minimum requirements. Table 4 provides data by 12 business groups for each county. Breakouts are provided for each business group within a county where at least 5 or more returns were filed in a fiscal year. An "S", representing "Suppressed", is used for any business group that does not have at least 5 returns filed.

There must be a minimum of five returns filed in a business group for the transaction data to be shown.
To protect the confidentiality of the businesses, if there are less than five returns filed an S (S=Suppressed) is displayed
If a county has only one business group suppressed than the next lowest return count is also suppressed.

Percentages may not sum to totals due to rounding
