Small Business Expensing

As of the time of printing, Iowa has not adopted the provisions of the federal American Recovery and Reinvestment Act of 2009 relating to increasing the expensing amount under section 179 of the Internal Revenue Code to \$250,000 for the 2009 tax year. The maximum amount of section 179 expensing for Iowa purposes will be \$133,000 for 2009.

Net Operating Loss Carryback

For tax years beginning on or after January 1, 2009, corporations are no longer allowed to carry back Iowa net operating losses. All net operating losses are allowed to be carried forward for 20 tax years. However, any federal refund due to the carryback of a federal net operating loss must still be reported as income on the Iowa return to the extent a deduction for federal taxes was allowed on prior Iowa returns.

Capital Loss Carryback

Corporations may still carry back a capital loss to the three

preceding tax years. Refund requests for a capital loss carryback should be made on new form IA 1139-CAP.

Repeal of Cow-Calf Refund

The cow-calf refund reported on form IA 132 was repealed for any claims filed on or after November 1, 2008. No cow-calf refunds will be issued in February 2010 for claims made on 2008 returns.

School Tuition Organization Tax Credit

For tax years beginning on or after July 1, 2009, corporations are eligible for the school tuition organization (STO) tax credit equal to 65% of the cash or noncash contribution made to a qualifying STO. Schedule D - Nonbusiness Income

If corporate business is entirely within Iowa, do NOT complete Schedule D.

The classification of income by the labels customarily given them, such as interest, dividends, rents, and royalties, is of no aid in determining whether that income is business or nonbusiness income.

Please provide all documentation to the substantial authority showing why the income should be allocated as nonbusiness income.

Instructions

When referring to the columns designated below, enter the amounts on lines 1 through 8 if the corporation's commercial domicile is Iowa. Enter amounts on lines 9 through 16 if the corporation's commercial domicile is outside Iowa. However, rent, royalty, and capital or ordinary gain income from real or tangible personal property is allocated to the situs of the property producing the income. Also, see Iowa Rule 54.2(3) for attribution of income from intangibles.

Column A Gross Income: Enter the amount of income on the appropriate line. If an entry is made on line 6 or 14, please attach federal Schedule D. If an entry is made on line 1, do not include any amounts previously deducted on line 13 of Iowa Schedule A relating to foreign dividends.

Column B Related Expense: Enter directly-related expenses and indirectly-related interest expenses on the appropriate line. Attach detailed schedules showing the computation of the related expense.

Column C Subtotal: Subtract column B from column A and enter the difference.

Column D 50% of Applicable Federal Income Tax: Enter 50% of the applicable federal income tax. Do not enter negative amounts. The effective tax rate equals line 5, page 1, divided by line 1, page 1, of form IA 1120. Multiply column C by this tax rate to determine your entry for column D. The total amount is limited to the federal tax deduction shown on line 5, page 1.

Column E Net Income: Subtract column D from column C and enter the difference.

Line 8: Add lines 1 through 7 of column E. Enter this amount on line 13 of the IA 1120, page 1.

Line 16: Add lines 9 through 15.

Line 17: Add lines 8 and 16. Enter this amount on line 9 of the IA 1120, page 1.

Schedule E - Business Activity Ratio

If your business activity is 100% Iowa, you do not need to complete Schedule E.

Complete all applicable lines. All figures are net of amounts used in Iowa Schedule D. Dividends are net of special deductions and the Iowa foreign dividend exclusion.

Business income means income which arises from the corporation's unitary trade or business, a part of which is conducted within Iowa. Business income must be apportioned to Iowa by means of the business activity ratio. Investment income may, at the taxpayer's election, be included in the computation of the business activity ratio. On the return, the taxpayer elects whether to include investment income which was determined to be business income in the computation of its business activity ratio for that and all subsequent years. Consequently, the subsequent year's total investment income which is determined to be business income is included in the numerator as follows:

- (1) Accounts receivable interest is to be included in the numerator to the extent allocable to Iowa.

- (2) Other interest, net dividends, capital and ordinary gains, and royalties from intangibles must be included in the numerator if the commercial domicile is in Iowa. See Iowa Rule 54.2(3) for attributing certain income from intangibles.
- (3) Capital and ordinary gains, rent, and royalties from tangible and real property must be included in the numerator if the property is located in Iowa.

For a corporation first doing business in Iowa, the inclusion of investment income determined to be business income in the business activity ratio of that year's initial return is binding on all subsequent years' returns. The election to include business investment income in the business activity ratio can later be changed only with permission of the Director of the Iowa Department of Revenue.

A copy of the federal document showing the final disposition or final federal adjustments must be attached to the notice in order to begin the 6-month period.
